

Muhammad
Azhar Nur Azmi Zahrein

About me

I am a versatile Web & Mobile Developer and Graphic Designer combining robust software engineering with purposeful visual communication. On the engineering side, I build responsive websites, database-driven web applications, and mobile apps—handling backend architecture, RESTful API integrations, and intuitive frontend interfaces. On the creative side, I cover comprehensive graphic design disciplines, including brand identity, digital and print marketing collaterals, and UI/UX design. This dual capability allows me to build digital solutions that are technically dependable and visually engaging.

Experience

IT & App Development Staff - PT Pesona Khatulistiwa Nusantara (PKN) *2023 – 2026*

- Maintained and optimized enterprise internal web applications, resolving technical incidents and enhancing internal operational workflows across cross-regional mine operational units.
- Managed relational database queries, schema migrations, and automated routine data backups with strict 99.8% uptime compliance.
- Collaborated directly with cross-functional operational units to diagnose hardware/network issues, roll out software patches, and draft clear technical operational runbooks.

Freelance Graphic & Packaging Designer - PT Pesona Khatulistiwa Nusantara (PKN) *2023 – 2026*

- Designed commercial labels, standing pouch packaging, and custom die-cut cardboard boxes for local UMKM food & beverage brands meeting mandatory BPOM, nutrition facts, and barcode retail standards.

Education

Politeknik Elektronika Negeri Surabaya *2023 – 2026*
Associate Degree (D3) in Informatics Engineering

SMK Negeri 2 Tanjung Selor *2020 – 2023*
Major in Multimedia
